

UJWAL UMESH DANGI

Senior PHP Laravel Developer | Backend API Specialist | High-Load Systems

Chembur, Mumbai, India | +91 7738605499 | ujwaldangi335789@gmail.com | ujwaldangij.github.io/portfolio/

PROFESSIONAL SUMMARY

Senior PHP Laravel Developer with 4 years and 9 months of experience building secure, high-load backend systems, API platforms, automation workflows and enterprise integrations for fintech, broker technology, healthcare, pharma and education domains. Strong hands-on experience in Laravel, PHP, REST APIs, JWT/Sanctum authentication, Redis caching, AWS SQS, email queues, SQL/stored procedures, Apache MPM tuning, Swagger/OpenAPI, Laravel Telescope, TCPDF, PHP GD Library, WhatsApp chatbot integration, MFA using Google Authenticator and browser automation using Laravel Dusk.

Delivered and maintained 400+ APIs across 90+ client integrations, including enterprise and financial platforms such as Paytm, PhonePe, NJ, Axis Bank, HDFC Bank, Dhan, CoinSwitch Kuber, KIFS, Indira, Geojit and broker/platform clients. Experienced in designing smart API flows for KYC, entries, file processing, reporting, token security, logging, caching, queue-backed processing and production support.

CAREER IMPACT SNAPSHOT

400+ APIs Delivered Built and supported large Laravel API ecosystem for fintech and broker operations.	90+ Client Integrations Worked on enterprise integrations across broker, fintech and platform clients.
High-Load Backend Design Used Redis, queues, async jobs and Apache tuning for heavy traffic workflows.	Security-First Development Implemented JWT/Sanctum, MFA, IP binding, rate limiting, API logs and KYC flows.

TECHNICAL EXPERTISE

Backend & APIs: PHP, Laravel, REST APIs, micro web services, OOP, MVC, Composer packages, queue jobs, cron jobs

Security & Authentication: JWT, Laravel Sanctum, token lifecycle, IP binding, rate limiting, MFA, Google Authenticator, API logging, KYC APIs

Performance & Scale: Redis, custom cache helper, queue-backed processing, async jobs, Apache MPM tuning, high-load API handling

Messaging & Notifications: AWS SQS, email queues, retry workflows, background jobs, WhatsApp chatbot and notification workflows

Database & Monitoring: SQL, stored procedures, query optimization, transaction handling, audit/reconciliation logs, Telescope, log viewers

Files & Automation: TCPDF, PHP GD Library, CSV exports, ZIP/7-Zip downloads, file upload APIs, Laravel Dusk, Selenium

Frontend & Deployment: JavaScript, React, HTML5, CSS3, jQuery, Bootstrap, admin dashboards, AWS, Apache, deployment support

PROFESSIONAL EXPERIENCE

Senior PHP Laravel Developer | Techexcel Software Solution Pvt. Ltd. *Mumbai | 13 Jun 2022 - Present*

- Architected and enhanced Techborest, a Laravel-based enterprise API platform with 400+ APIs supporting 90+ client integrations across fintech, broker technology and enterprise platforms.
- Built production-grade APIs for KYC, receipt and entry processing, client onboarding, file uploads, CSV exports, ZIP/7-Zip downloads, PDF generation, image processing, reporting and role-wise access.
- Implemented JWT authentication and Laravel Sanctum token validation with token lifecycle controls, IP binding, rate limiting, API logging and broker-specific security requirements.
- Implemented Redis caching and custom cache helper logic that checks active cache drivers and falls back between Redis, database cache and file cache based on environment flags.
- Worked on high-load backend processing, queue-based workflows and Apache MPM tuning to improve concurrency, request handling and reliability for heavy API traffic.
- Integrated AWS SQS and email queue workflows for asynchronous notifications, retry-based processing and non-blocking API responses.
- Implemented MFA workflows using Google Authenticator for broker-required secure access and sensitive operation validation.
- Used Swagger/OpenAPI, Laravel Telescope, log viewer packages and structured exception logging to improve documentation, debugging, monitoring and production support.
- Created TCPDF-based PDF modules for receipts, reports and business documents, along with GD Library-based image processing and file-handling utilities.

- Integrated WhatsApp chatbot and notification workflows, and built role-wise admin dashboards to monitor entries, API requests, statuses, logs and application activity.

Junior Web Developer | Exicon Media Solutions Pvt. Ltd. *Mumbai | 16 Aug 2021 - 10 Jun 2022*

- Developed a webinar management system used by pharma companies including IPCA, Mankind and Dr. Reddy's Lab for live doctor sessions, product branding and online medical engagement.
- Created CMS-driven portals with live video display, audience comments, manager PO workflows, billing modules and real-time interaction features.
- Integrated Zoom and Vimeo streaming workflows through APIs and iframes for smooth live video delivery to healthcare audiences.

SELECTED PROJECTS

Techborest - Enterprise API Platform

- Built and maintained 400+ Laravel APIs for 90+ clients covering fintech integrations, KYC, receipt/entry processing, authentication, file handling, reporting, monitoring and client-specific workflows.

Techrisk - Broker Risk Management System

- Developed broker dashboards for market conditions, security performance, portfolio risk, exposure and diversification; automated bhav file processing from NSE, BSE, MCX and NCDEX using Laravel Dusk and scheduled jobs.

Smart API, Cache & Queue Framework

- Created high-load API patterns with Redis/database/file cache fallback, structured logs, retry workflows, queue-backed processing and production-ready exception handling.

WhatsApp Chatbot & Notification Integration

- Integrated WhatsApp chatbot workflows, email queue processing and SQS-backed asynchronous communication for business use cases.

DoctorHealthChecker - Healthcare System

- Built a healthcare platform for Somaiya Hospital with admin, MR, Pythokind, Thyrocare and manager roles, appointment scheduling, reminders and test-result workflows.

Webinar Management System - Pharma Domain

- Created doctor webinar portals with CMS setup, live streaming, commenting, PO management and billing support for pharma clients.

EDUCATION

Bachelor of Computer Science, Mumbai University | 2019 - 2021 | First Class Distinction

Higher Secondary School, Maharashtra State Board | 2017 - 2018 | Second Class Distinction

PROFESSIONAL FOCUS

Backend API development | High-load Laravel systems | Fintech and broker integrations | API security | Redis caching | Queue-backed processing | Production debugging | Automation | Documentation | Enterprise client support
